Things to be checked by students:

- **Sites for Color Palettes**
 - [ColorHunt.co](https://colorhunt.co)
 - [Coolours.co](https://coolours.co)
 - [Colorkit.io](https://colorkit.io)
 - [Colors.muz.li](https://colors.muz.li)
 - mycolor.space

- brandcolors.net
- colorleap.app/home
- colorlisa.com
- Webgradients.com
- Materialpalette.com

- **Font Plugin in Figma**

- Font Viewer
- Font Preview
- Better Font Picker

- **Font Extension for browser**

- Google Fonts - allows you to easily access and use a wide range of web fonts from the Google Fonts library.
- FontFace Ninja - allows you to identify fonts used on a website by hovering over them, and also provides a font bookmarking feature.
- FontFinder - similar to FontFace Ninja, allows you to identify and bookmark fonts used on a website.
- WhatFont - another font identifier tool that lets you quickly identify fonts used on a website by clicking on them.
- Type Sample - allows you to test out different fonts on any website, giving you a preview of what they will look like.
- Stylebot - not specifically a font extension, but it does allow you to change the font style and size of any website you visit, among other things.
- Font Changer - allows you to change the font style and size of any website you visit, with a focus on improving readability.

- **Color Extension for browser**

- ColorZilla - allows you to quickly identify and copy the color code of any element on a webpage.
- Eye Dropper - similar to ColorZilla, it lets you pick any color on a webpage and get the corresponding code.
- Palette Creator - allows you to generate color palettes from any image on a webpage, which can be useful for creating design schemes.

- ColorPick Eyedropper - another color picker tool that lets you easily get the hex code of any color on a webpage.
- Color Enhancer - a tool that lets you adjust the colors on a webpage to improve readability or reduce eye strain.
- Color Tab - a simple extension that gives you quick access to a range of colors, letting you easily switch between them.
- Just Color Picker - a tool that lets you pick colors from anywhere on your screen, not just within your browser.
