

5CS020-HCI (Human Computer Interaction)  
Week - 6

# Navigation and its evaluation

April, 2024

# Introduction

- Navigation (Predominantly websites, but applies to other areas)
- Evolution of navigation in UI
- Evaluation methods (If our navigation design works)

<https://blog.optimalworkshop.com/10-examples-of-great-website-navigation-and-why-theyre-awesome-part-1/>

# Finding Stuff before

- Navigation means finding content (in the context of user interfaces)
- When google was established in 1998, there were 2.4 million websites
- Web navigation happened through
  - Search Engines (Word matching, 'AltaVista')
  - Web Pages (Text hyperlinks, sidebar)

# Finding stuff now

- There are more than a billion websites
- Web navigation happens through
  - Search engines (Semantic/ Meaning based, Auto complete, Google, Bing, ...)
  - Web pages (links, menu based on text, ...)
- Modern websites feature several navigation systems - all designed to make navigation easier

# Navigation Mechanisms

That we will explore today

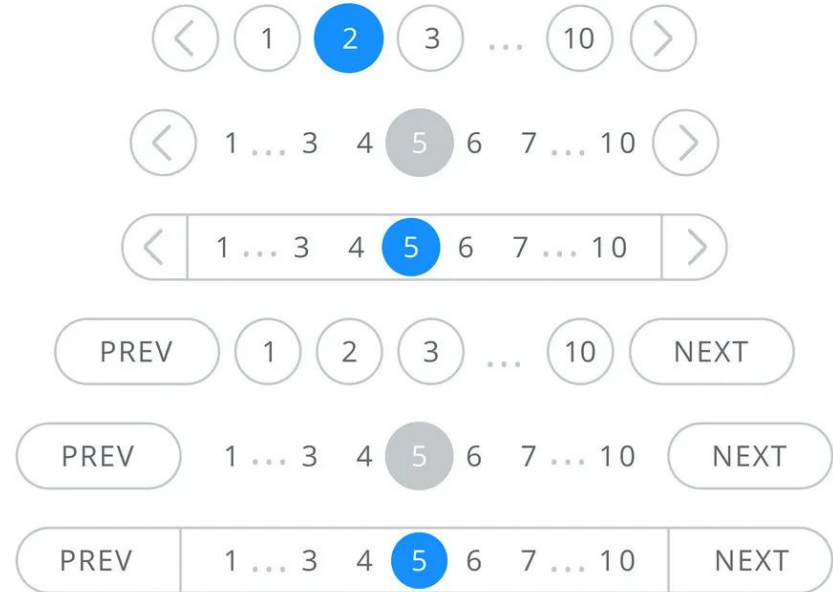

- Websites
- Touchscreens
- Gestures

# Navigation Mechanisms in websites

- Paging
- Breadcrumbs
- Bars and tabs
- Vertical menus
- Site maps
- Trees
- A-Z Directories
- Dynamic and drop-down menus
- Visualization

# Paging/ Pagination

- Process of separating content into discrete pages
- Consecutive web pages are linked via textual links

<https://www.vectorstock.com/royalty-free-vector/pagination-bar-page-navigation-web-but-tons-vector-22654788>

# Breadcrumbs

- Indicates the path that the user is on and the current location
- Research suggests, breadcrumbs not frequently used

# Dynamic and Drop-down menus

# Visualization

# No need to use all of them at once

Multiple options improve choice but  
also increase complexity and clutter

The screenshot shows the Amazon.co.uk website interface. Red arrows highlight the following elements:

- Search Bar:** Two arrows point to the search bar, one to the dropdown menu (currently showing "Electronics & Photo") and one to the search button (magnifying glass icon).
- Department Navigation:** An arrow points to the "Shop by Department" dropdown menu.
- User Account:** An arrow points to the "Hello, Your" user account link.
- Category Navigation:** An arrow points to the "Electronics" category link in the top navigation bar.
- Left Sidebar:** An arrow points to the "Electronics & Photo" category link in the left sidebar.
- Main Content:** An arrow points to the "The Electronics Store" heading.
- Product Card:** An arrow points to the "iPhone 8, 8 Plus and X store" product card.

GREAT IMAGE!

# Navigation has evolved

It is not just desktop based anymore

- Small Screens (Mobiles, Tablets)
- Touch Screens
- Gesture Based Control

# UI evolution after small screens

- Remove clutter
- 4-8 items in a navbar
- Prioritize functionality in the start screen
- Keep navigation consistent
- High contrast

# UI evolution after touch screens

- Touch target sizes
- Adequate margins
- Feedback mechanism
- Card layouts

# Gesture Based Control

## Gesture based

- Mobile Navigation
- Desktop/ Laptop Navigation
- VR Navigation

# Evolution of Gesture Based Control

- Overlaps with ‘traditional’ touch screen control
- Influenced by Steven Spielberg movie ‘Minority Report’ (2002)
- Credited with influencing gesture control and more modern tech
- [9 touchless technology inspired by Minority Report](#)

<https://www.cnet.com/culture/entertainment/the-minority-report-future-15-years-later-podcast/>

# Generic Gesture Based Control

**Tap**

Briefly touch surface with fingertip

**Double tap**

Rapidly touch surface twice with fingertip

**Drag**

Move fingertip over surface without losing contact

**Flick**

Quickly brush surface with fingertip

**TILT**

**SHAKE**

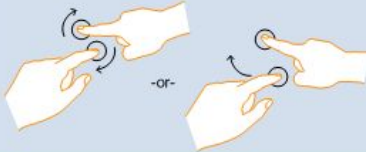

**MULTI TOUCH**

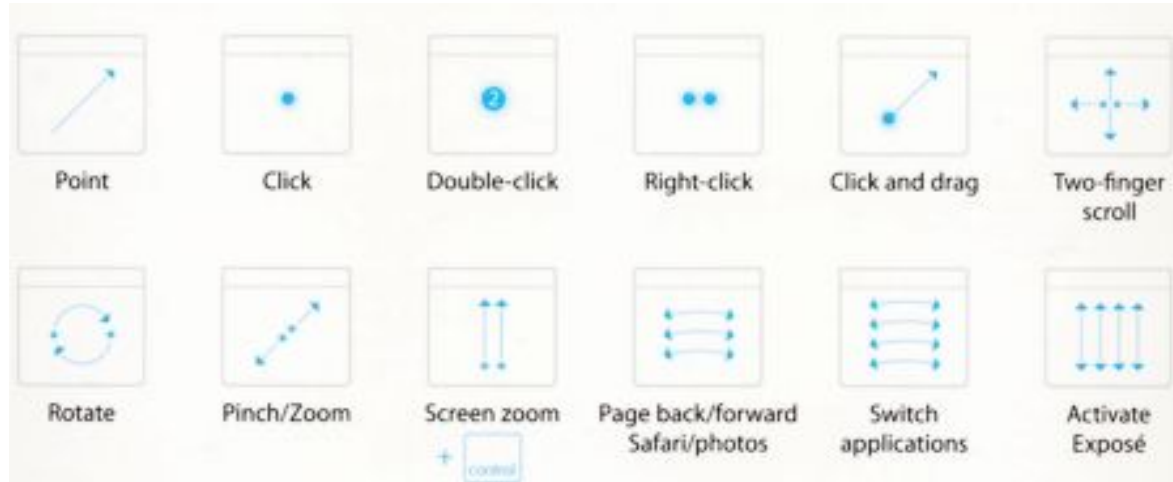

[Touch Gesture Reference Guide](#)

# Gestures in microsoft windows (7 onwards)

GESTURE	WINDOWS USAGE	GESTURE ACTION	ACTION (○ = finger down   ○ = finger up)	Single Contact	Multi Contact
Selection / Drag (left to right with one finger)	Mouse Drag / Selection	Drag one finger left / right			
Zoom	Zoom (defaults to CTRL key + Scroll wheel)	Move two fingers apart / toward each other			
Rotate	No system default unless handled by Application (using WM_GESTURE API)	Move two fingers in opposing directions -or- Use one finger to pivot around another			

# Gestures in Apple Trackpad

<https://www.maciverse.com/magic-trackpad-gestures.html>

# Current issues in Gesture Control

- Touch targets are forgotten
- Relying strictly on icons
- Higher error rates
  - Swips can be too quick/ slow or too short/ long

<https://haileyjaderyan.com/2016/03/25/10-things-that-will-make-me-swipe-left-on-tinder/>

**Navigation is  
bound to evolve**

# Navigation has to be tested

# Navigation Evaluation

- Navigation also needs to be tested like usability
- There are several ways to evaluate navigation
  - Heuristic Evaluation (already discussed)
  - Stress Testing
  - User Observation
  - Surveys/ Questionnaires
  - Metric Analysis

# Stress Testing Navigation

- Not to be confused with stress testing in load balancing
- During navigation testing, asking a series of questions
- If the questions can't be answered, the navigation doesn't 'work'
- Some generic questions
  - Where am I?
  - What's here?
  - Where can I go?

# Stress Testing Navigation

- A checklist of questions can be prepared
  - What is “up” 1 level from here?
  - How do I get to the top of the section of the site?
  - How do I get to the homepage of the site?
  - What major section is this page in?
- These questions can be asked at any point in the flow testing

# User Observation

- Literally observing users using the software/ hardware and noting their feedback
- Ideally done after a heuristic evaluation
- Sometimes it might also include a walkthrough in the early stages of the design process

<https://www.keepitusable.com/blog/5-benefits-of-observing-ux-research-in-person/>

# Surveys/ Questionnaires

- More 'traditional' data collection method
- Poor return rate if not administered remotely (postal/ online)
- Important to make data quantitative rather than qualitative

<https://www.surveylegend.com/research/survey-testing/>

# Metric Analysis

- Page Hits
- Site Hits
- Log file analysis
- Forum posts/ comments

<https://monkeylearn.com/blog/data-analysis-examples/>

**Regardless of evaluation,  
feedback needs to be  
reviewed before  
incorporation**

# Any questions?
